Summary

Information Science & Engineering student at BMSIT&M (CGPA: 8.95) with hands-on experience in Java, Python, and full-stack web development. Solved **100+ LeetCode problems** with strong foundations in DSA, DBMS, OS, and Computer Networks. Built end-to-end projects involving REST APIs, authentication, and database design. Seeking a fresher software engineering role to contribute technically from day one.

Education

BMS Institute of Technology & Management (BMSIT&M)	Bengaluru, India
<i>B.E. in Information Science & Engineering</i>	<i>2023 – 2027</i>
CGPA: 8.95 / 10.0	

Technical Skills

Languages:	Java, Python, C, SQL, JavaScript
Backend:	JSP, Servlets, JDBC, REST APIs, JWT Authentication, Session Management
AI/ML:	OpenCV, spaCy, NLTK, Face Recognition, NLP
Database:	MySQL, Schema Design, Normalization, Complex SQL Queries
Tools:	Git, VS Code, Eclipse, Figma, AWS EC2, Linux
CS Fundamentals:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Experience

Software Engineering Virtual Internship	2026
<i>JPMorgan Chase & Co. – Forage Virtual Experience Program</i>	
- Completed open-source software engineering simulation involving real-world codebases and financial data interfaces following industry SDLC practices. - Diagnosed and fixed broken data feeds, then built live trader visualizations using JPMorgan's Perspective tool demonstrating strong debugging and troubleshooting skills. - Practiced Agile development workflows including code review, iterative development, and Git version control in a professional engineering environment.	

Projects

Smart Healthcare Appointment System	2026
<i>Spring Boot, REST API, JWT, MySQL, AWS EC2</i>	
- Engineered a RESTful API healthcare platform with JWT-based authentication and role-based access control for Doctor, Patient, and Admin — following complete SDLC from design to deployment. - Implemented appointment conflict detection logic, automated email notifications via JavaMail, and documented all endpoints using Swagger UI. - Designed normalized relational database schema with 5+ tables, wrote optimized SQL queries, and deployed the application on AWS EC2. [GitHub]	
AI-Powered Resume Screener	2025
<i>Python, Flask, spaCy, NLTK, MySQL</i>	
- Built an NLP-based screening tool that parses PDF resumes, extracts skills via spaCy Named Entity Recognition, and ranks candidates against job descriptions using TF-IDF and cosine similarity. - Developed an admin dashboard with candidate analytics and CRUD operations via Flask REST endpoints backed by MySQL — reducing manual screening effort by ~70%. [GitHub]	

Certifications

• Oracle Java SE 17 Developer – Oracle Certified Professional	2025
• CS50x: Introduction to Computer Science – Harvard University / edX	2026
• AWS Certified Cloud Practitioner – Amazon Web Services	2025
• Meta Backend Developer Professional Certificate – Coursera	2025
• Google UX Design Professional Certificate – Coursera	2025
• Java Programming Certificate – HackerRank	2024
